Public Works Report

Jonathan has completed his C Well class and is scheduled to take his C Well exam Feb 26, 2026. He is signed up for C distribution Class that starts Feb 24, 2026.

Water Leak on Middle Street we had Clayton Plumbing come and fix as we don't have the equipment.

Had to purchase New Chlorine Analyzer as the old one was rusted and not working properly. The new one should last for many years and keep us in compliance at the Waste Water Lagoon.

I would also like to let everyone know that James and Jonathan did an amazing job removing snow where they could from the streets and sidewalks in town.
